

Performance Profile Sheet (Page 1 of 2)

NCCER Training

Craft: Pipeline Corrosion Control Level 1
Module: CT5_2-17
Module Title: Examining for External Corrosion on Buried or Submerged Pipe

Trainee Name:

Training Program Sponsor:

Instructor:

Rating Levels: (1) Passed: performed task (2) Failed: did not perform task
 Also, list the date the testing for each task was completed.

Recognition: When testing for the NCCER Training Program, be sure to record Performance testing results on the Registration of Training Modules form, and submit the results to the Training Program Sponsor.

OBJECTIVE	TASK	RATING	DATE	START TIME	END TIME
3	Examine buried or submerged pipe for external corrosion (CT5_2-17).				
	Identify potential abnormal operating conditions (AOCs) that may occur during performance of this CT, and know the appropriate actions to take in response to them.				
	Utilize the appropriate personal protective equipment according to relevant company procedures.				
	Visually observe the exposed pipe for evidence of integrity issues (such as metal deformation or evidence of a release), and confirm that the pipeline surface has been prepared for inspection.				
	Examine the exposed pipe for any areas of external corrosion.				
	Identify the type(s) and location(s) of any corrosion found, and record your findings.

Module Title: Examining for External Corrosion on Buried or Submerged Pipe

OBJECTIVE	TASK	RATING	DATE	START TIME	END TIME
	Measure the longitudinal axis of the corroded area(s) to determine the length. Measure the depth of the pit(s) using a pit depth gauge. Note the location of the corroded area of the pipe (top, bottom, or sides). Record all information according to company policies and procedures.				
	Complete appropriate documentation as required by operator's procedures.
